

OPCE Graphic Editor

Description:

Target and Clutter Areas may be defined by the way of the OPCE Graphic Editor Interface which permits to delimitate areas by defining regions of interest on a visual representation of the data to be processed.

Only one single area can be selected to define the Target Class or the Clutter Class.

The OPCE Graphic Editor proposes the following different functionalities:

- **1** : Select the Target Class (red line).
- **2** : Select the Clutter Class (blue line).
- **3** : Clear the different contours on the chosen area.
- **4** : Delete the two Target and Clutter areas from the list.
- **5** : Rectangular selection of Area of Interest (AoI).
- **6** : Polygonal selection of Area of Interest (AoI).
 Note: The contour is automatically closed by clicking on the Mouse Right Button.
- **7** : Save the Target and Clutter areas list.
 The default output file name is set to **MD / OPCE_areas.txt**.
- **8** : Redraw the Target and Clutter Areas.
- **9** : Exit the OPCE graphic editor.
