

ASAR ENVISAT (ESA) Input Data File

Description:

This Application is used to select the **ASAR AP (Alternating Polarisation mode)** data file to be processed.

The ENVISAT/ASAR package accepts the following format input data (level 1):

- ASAR-APS: Alternative Polarization Mode Single Look Complex
- ASAR-APP: Alternative Polarization Mode Precision Image
- ASAR-APG: Alternative Polarization Mode Ellipsoid Geocoded Image

Comments:

Parameters written in Red can be modified directly by the user from the keyboard.

Input/Output Arguments:

Input Directory	Indicates the location of the considered Main Directory (MD) containing the ASAR-AP data file to be converted.
Output Directory	Indicates the location of the converted data output directory. The default value is set to the Main Directory.
ASAR Input Data File	Corresponds to the input ASAR-AP format data file to be processed.
