

## Mask Area Graphic Editor

### Description:

Mask Areas may be defined by the way of the Mask Area Graphic Interface which permits to delimitate areas by defining regions of interest on a visual representation of the data to be classified.

The Mask Area Graphic Editor proposes the following different functionalities:

- **1** : Create a new Mask Area and add it to the list.
- **2** : Delete the current Mask Area from the list.
- **3** : Clear the different contours on the chosen image.
- **4** : Delete all the Mask Areas from the list.
- **5** : Save the Mask Areas list.
- **6** : Rectangular selection of Area of Interest (AoI).
- **7** : Polygonal selection of Area of Interest (AoI).  
Note: The contour is automatically closed by clicking on the Mouse Right Button.
- **8** : Toggle selected area contour color (black / white).
