

ROI Graphic Editor

Description:

A ROI Area may be defined by the way of the ROI Graphic Interface which permits to delimitate areas by defining regions of interest on a visual representation of the data to be classified.

The ROI Graphic Editor proposes the following different fonctionnalités:

- **1** : Clear the different contours on the chosen ROI.
- **2** : Delete all the ROI Area from the list.
- **3** : Save the ROI Area.
The default output file name is set to [MD / training_areas.txt](#).
- **4** : Rectangular selection of Region of Interest (RoI).
- **5** : Polygonal selection of Region of Interest (RoI).
[Note: The contour is automatically closed by clicking on the Mouse Right Button.](#)
- **6** : Toggle selected area contour color (black / white).
